

# Ferrule Crimping Tool

GJ709

## Overview

The ferrule crimping tool is an ideal solution for pressing ferrules and creating a crimp. The self-adjusting mechanism and ergonomic design allow for a fatigue-reduced operation. This ferrule crimping tool is suitable for insulated and uninsulated ferrules ranging from 0.25 to 6 mm<sup>2</sup>.

## Benefits

**Self-adjusting** crimping tool for end sleeves

**Suitable** for insulated and uninsulated ferrules from 0.25 to 6 mm<sup>2</sup>

**Non-slip** handle for comfortable operation

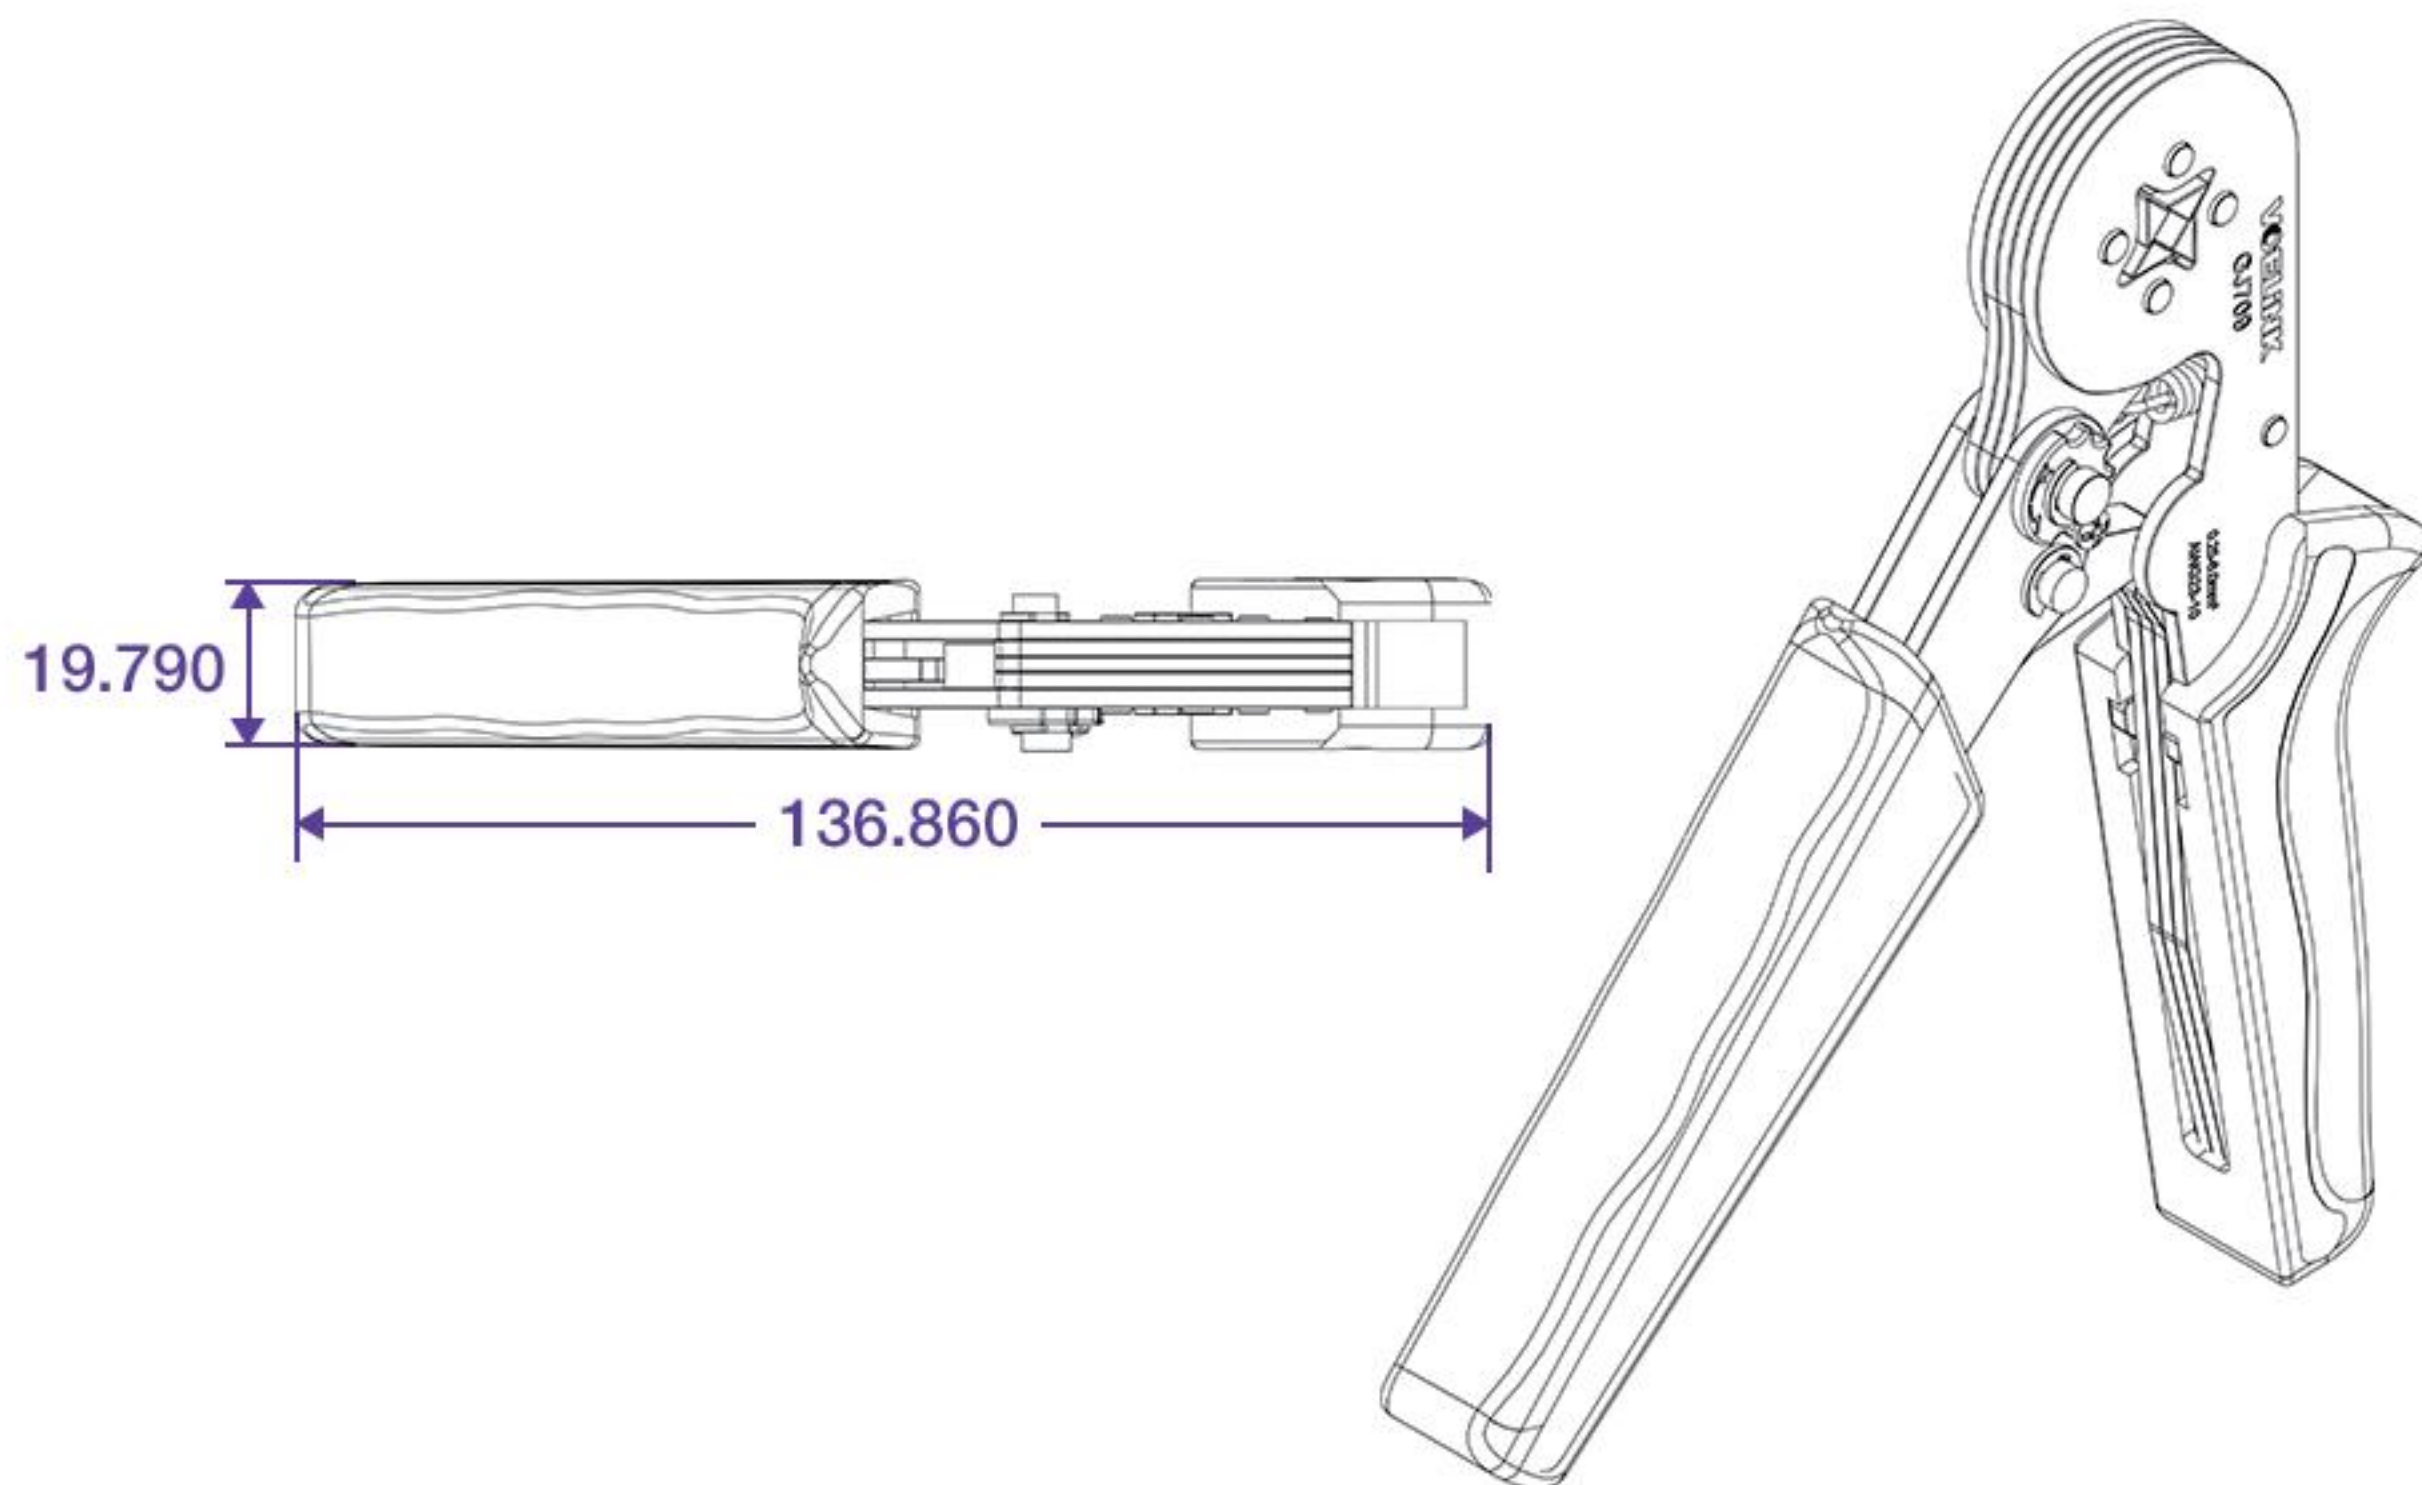

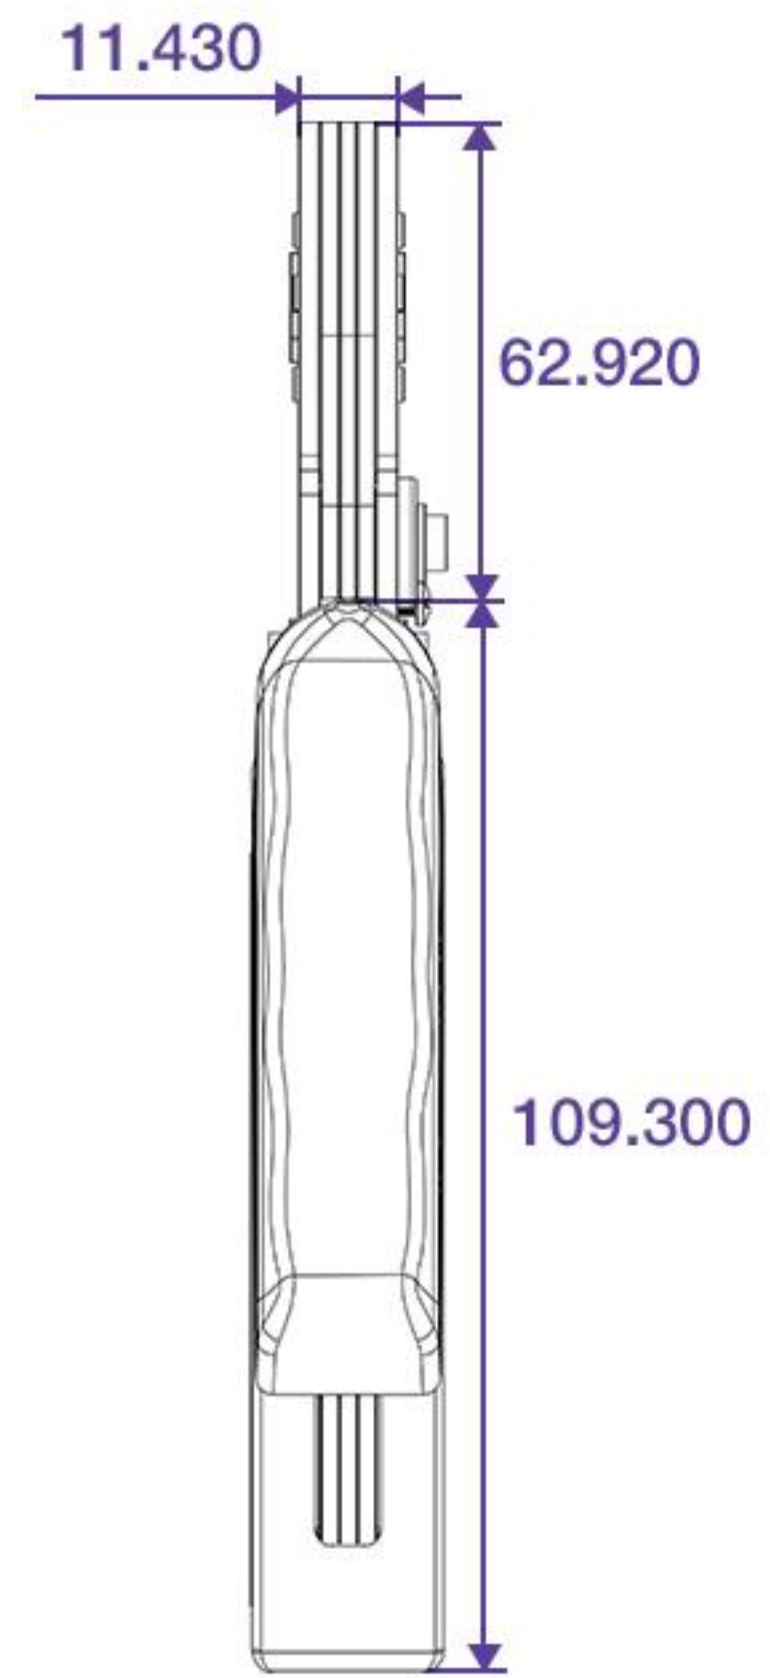

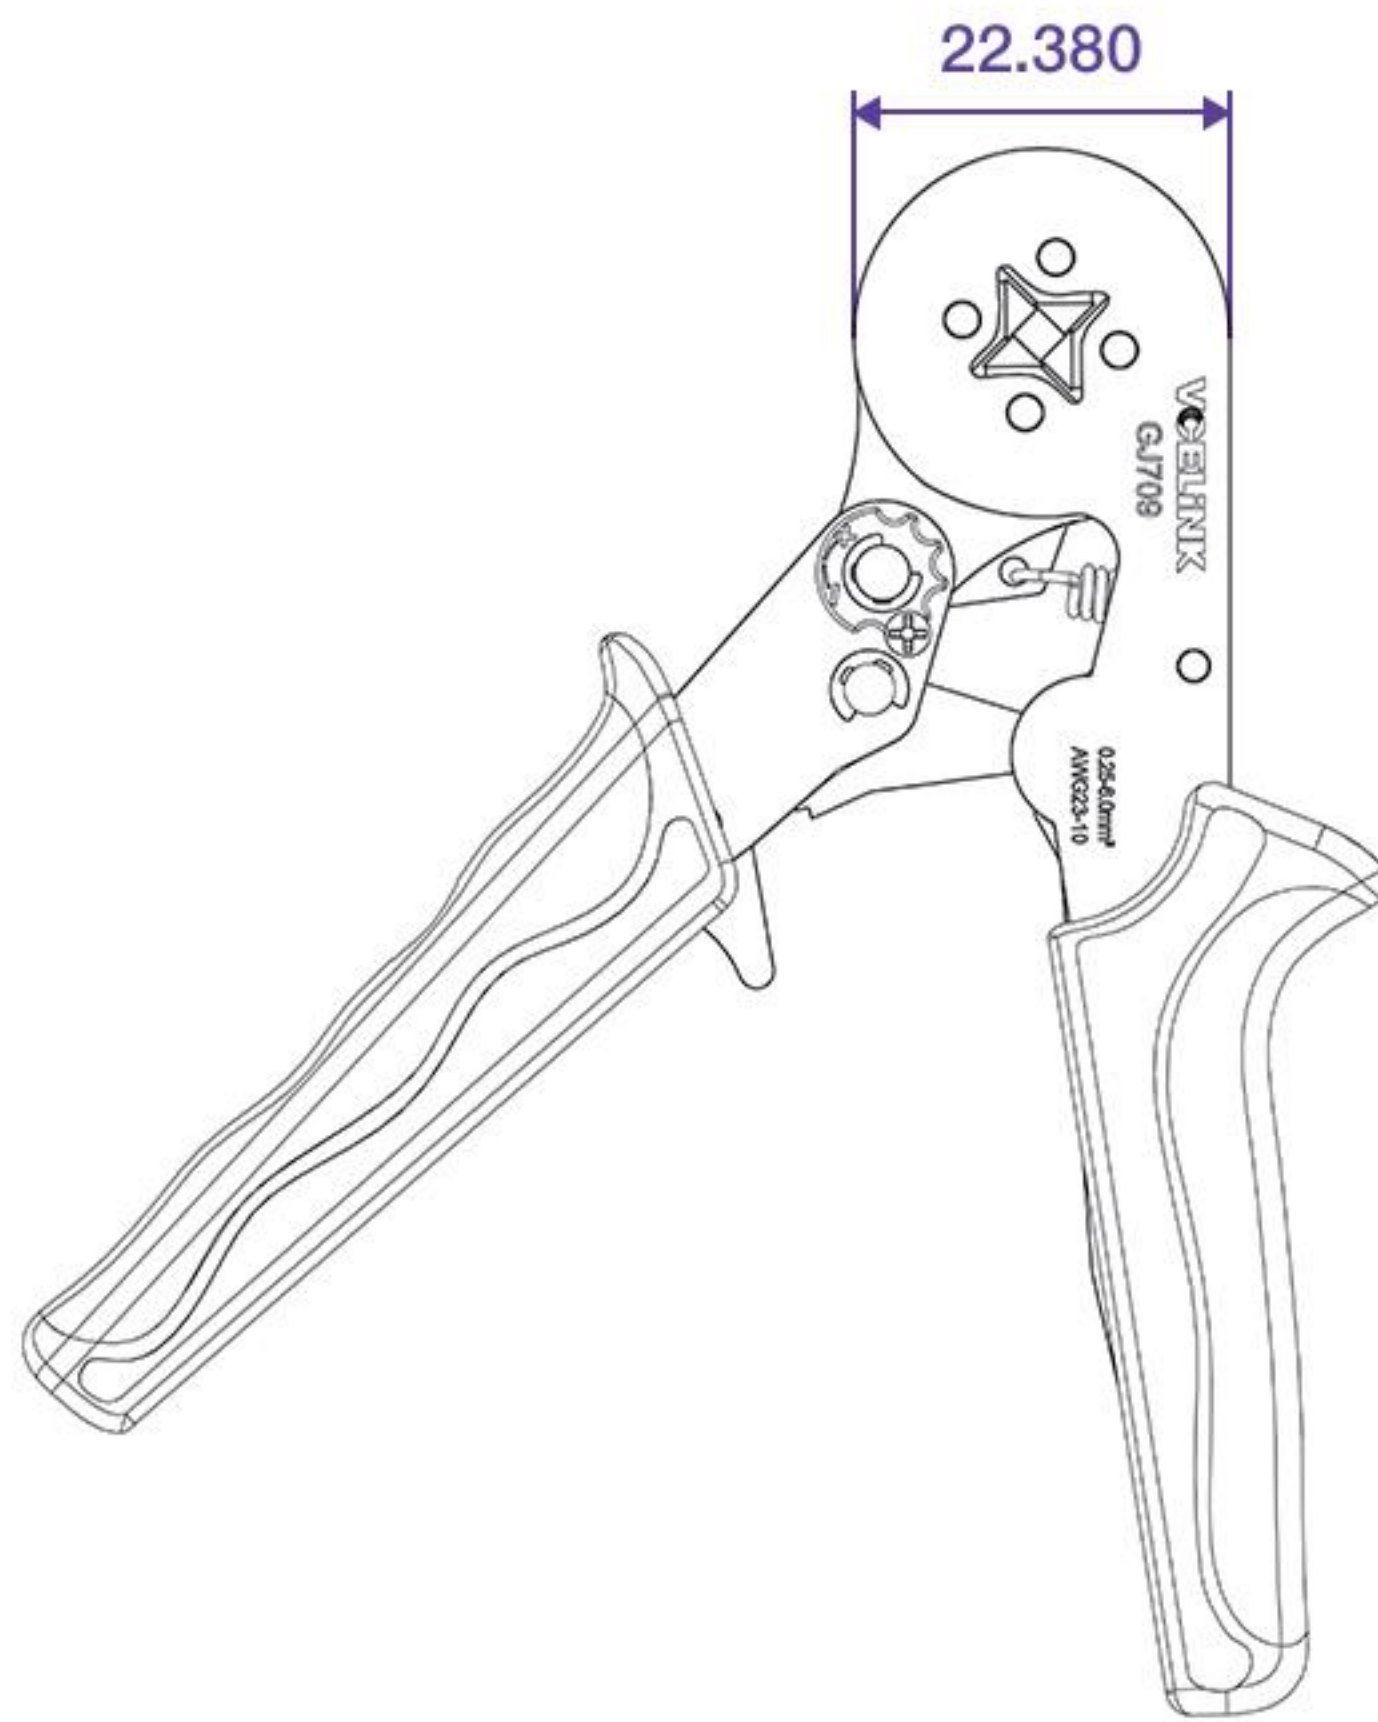

**Ergonomic** design for fatigue-reduced operation

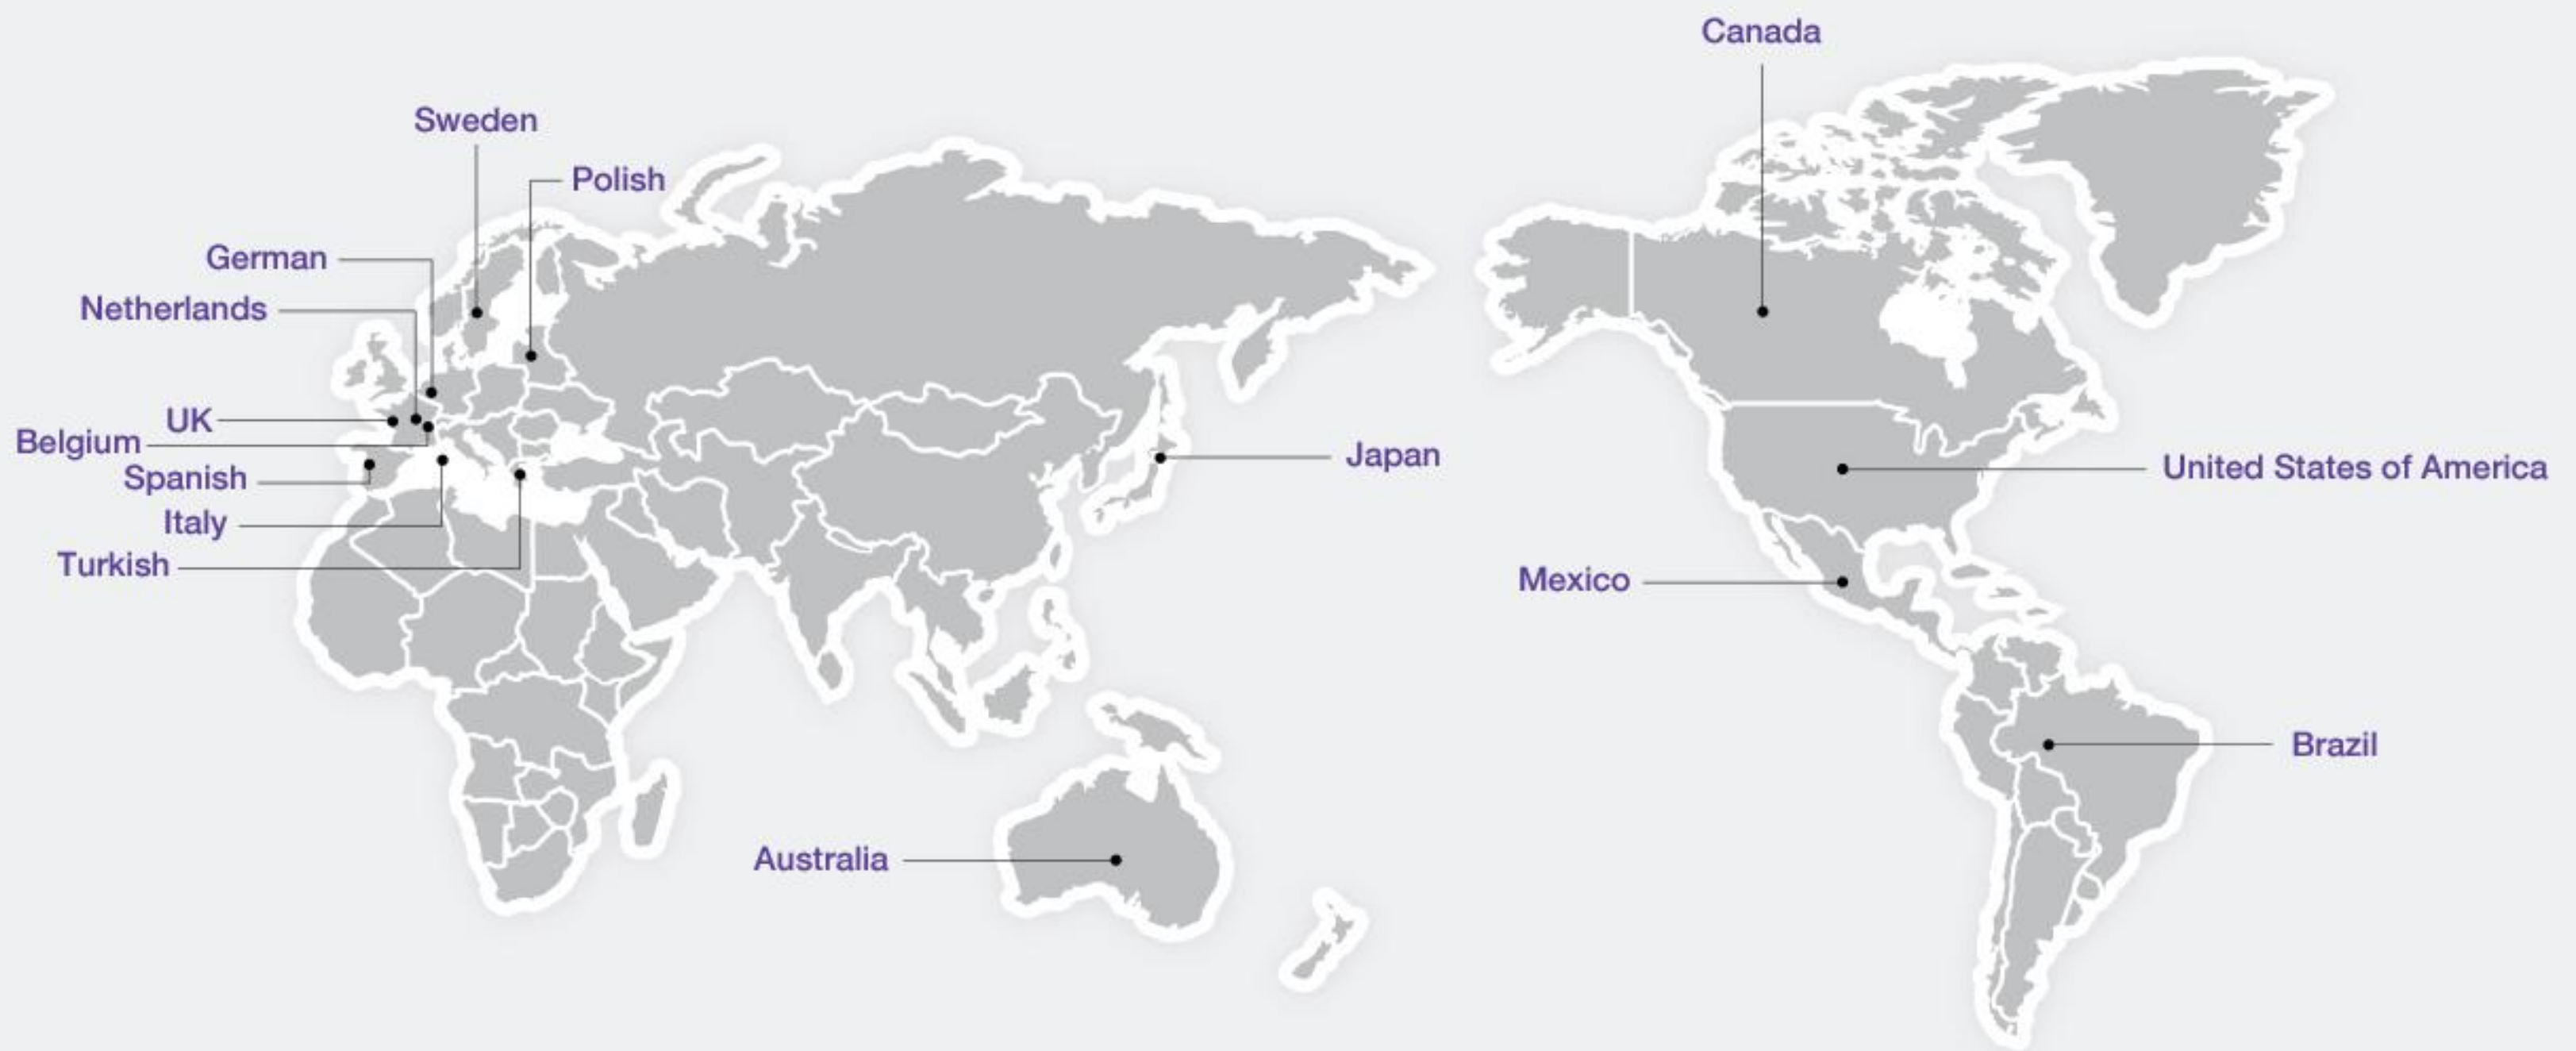

## Technical Specification

| Parameter             | Value                                                                                     |
|-----------------------|-------------------------------------------------------------------------------------------|
| Product Type          | Ferrule Crimping Tool                                                                     |
| Color                 | Black and Orange                                                                          |
| Weight                | 400g                                                                                      |
| Size                  | 6.89" x 1.69"                                                                             |
| Handle Material       | PVC(Orange) + TPR(Black)                                                                  |
| Body Material         | Carbon Steel Q235, Electroplating                                                         |
| Ferrule Crimper Range | 10 AWG to 23 AWG                                                                          |
| Ferrule Crimper Types | Insulated or Uninsulated                                                                  |
| Application           | Suitable for Crimping Into a Tight Square of 0.25mm <sup>3</sup> to 6mm <sup>3</sup> Wire |
