

# Keystone Punch Down Tool

GJ672

## Overview

The keystone punch-down tool is an efficient item for keystone jack termination. It allows for punching down eight wires together in one motion, effectively saving you time and money. However, it should be noted that it is only compatible with our 90-degree, unshielded Ethernet keystone jacks.

## Benefits

**One-strike** termination for eight copper wires

**Reduces** the possibility of breaking Ethernet cables and keystone jacks

**Allows** for a clean and neat cut

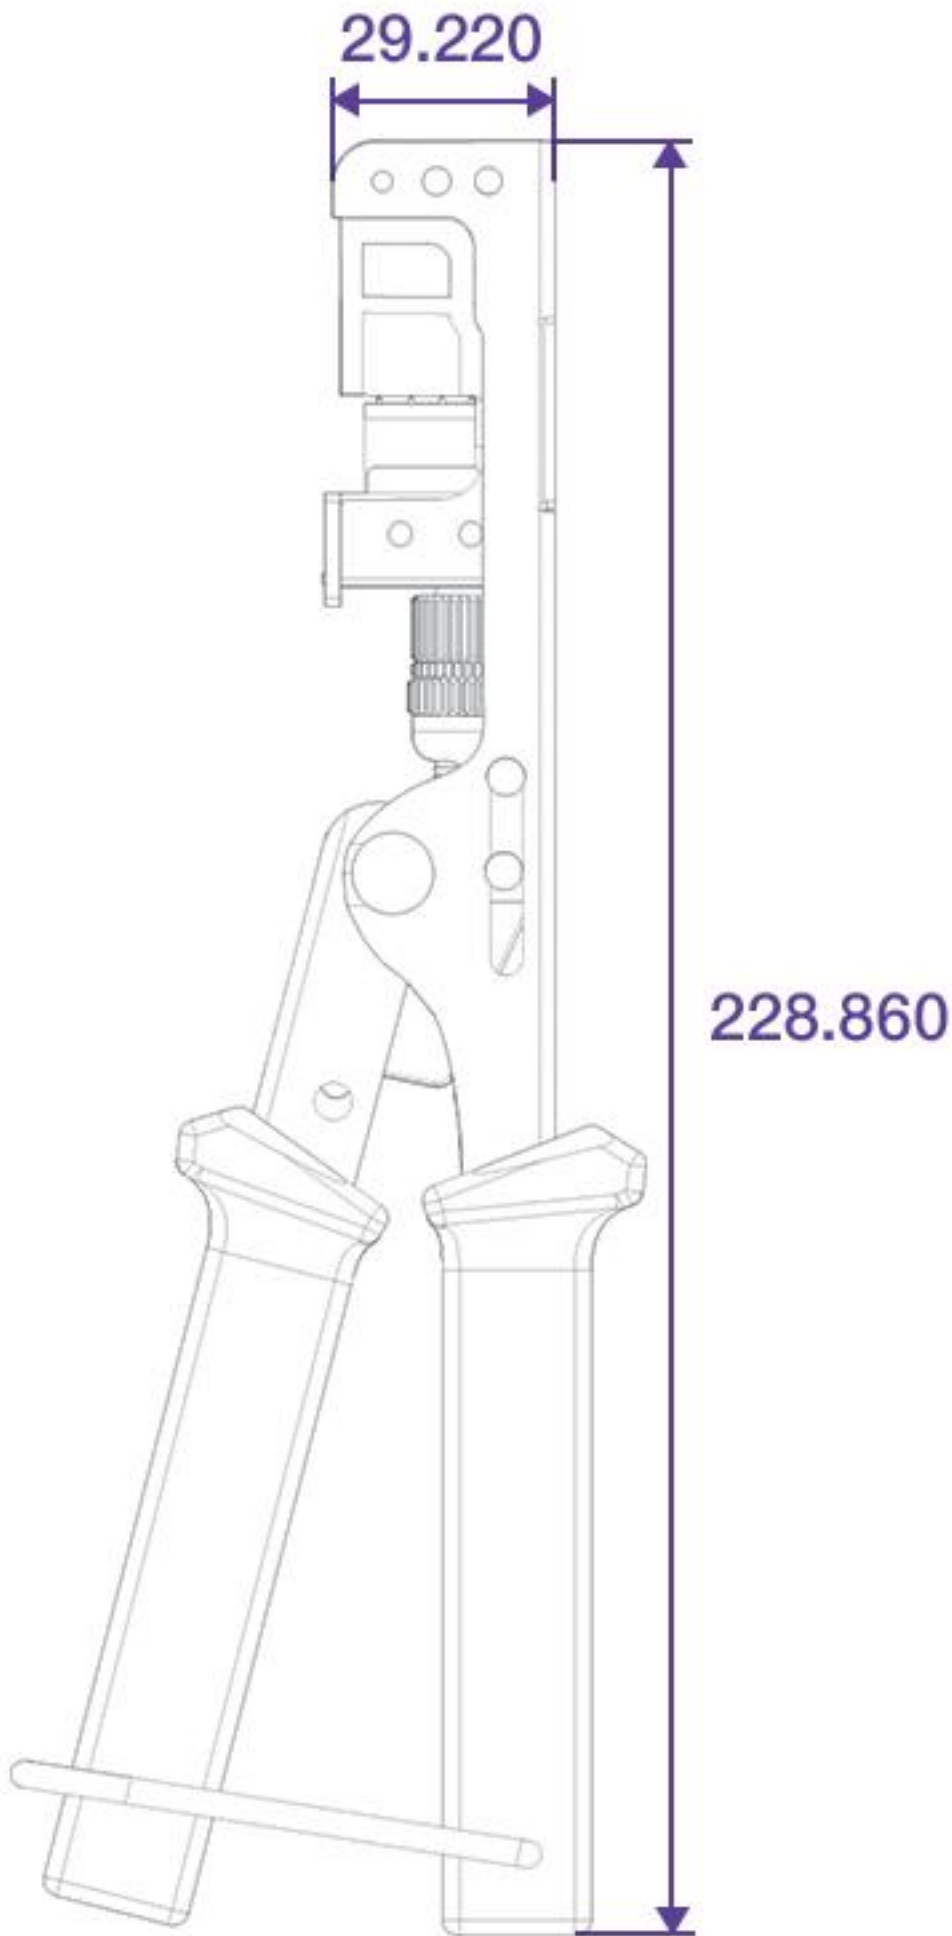

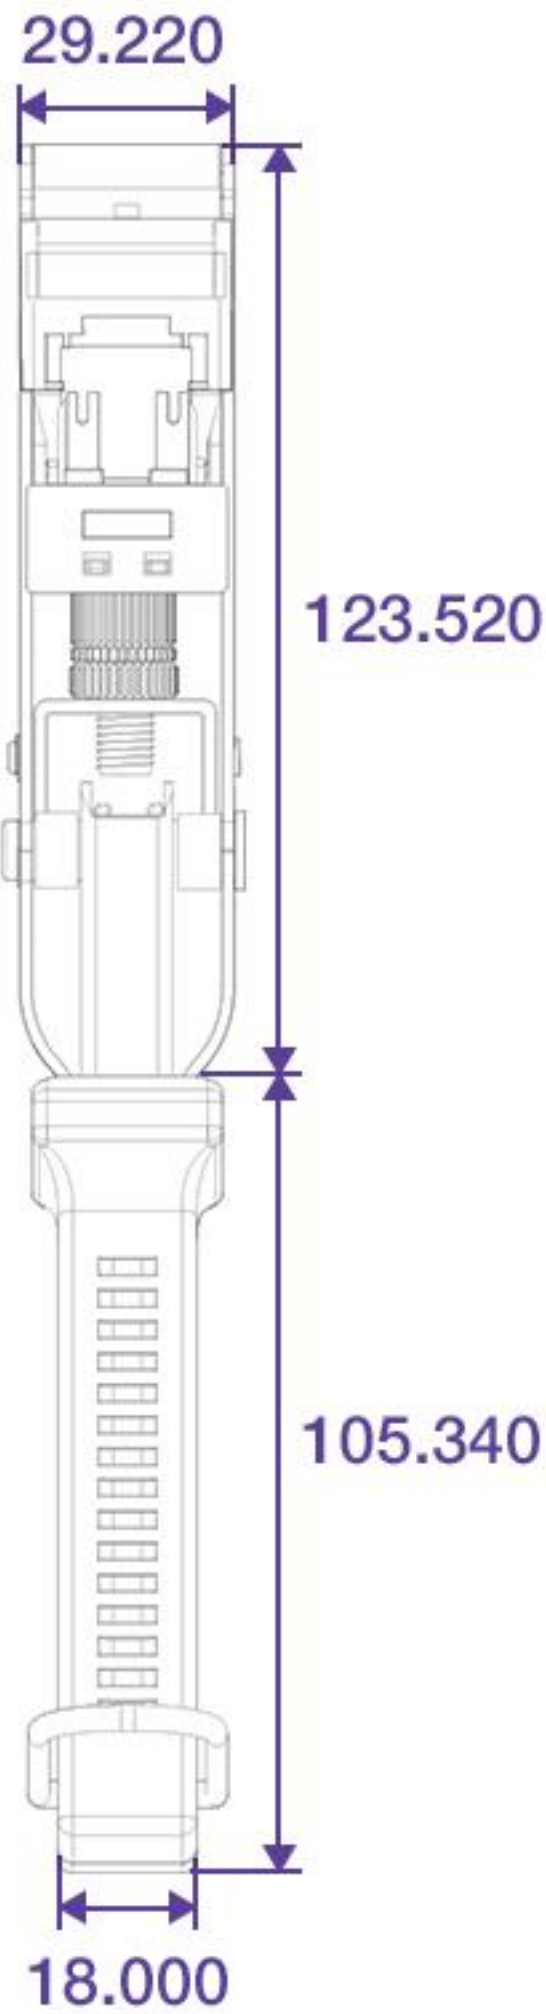

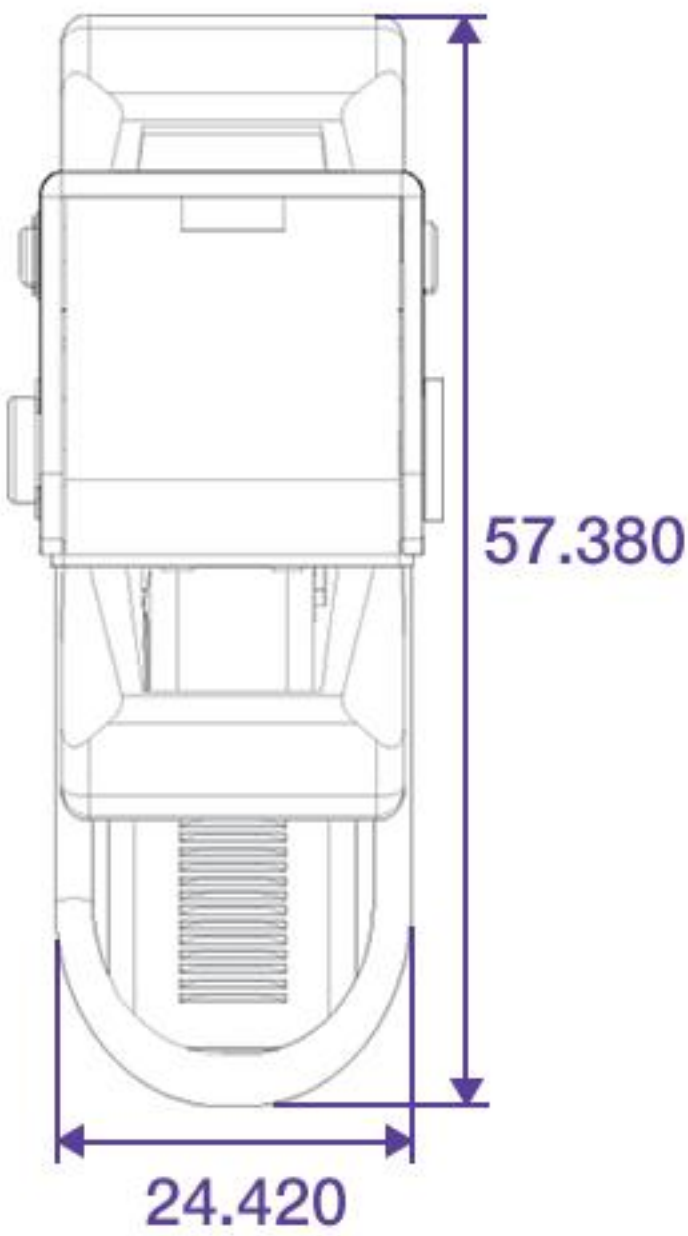

**Retaining** ring keeps the crimper closed when it is not in use

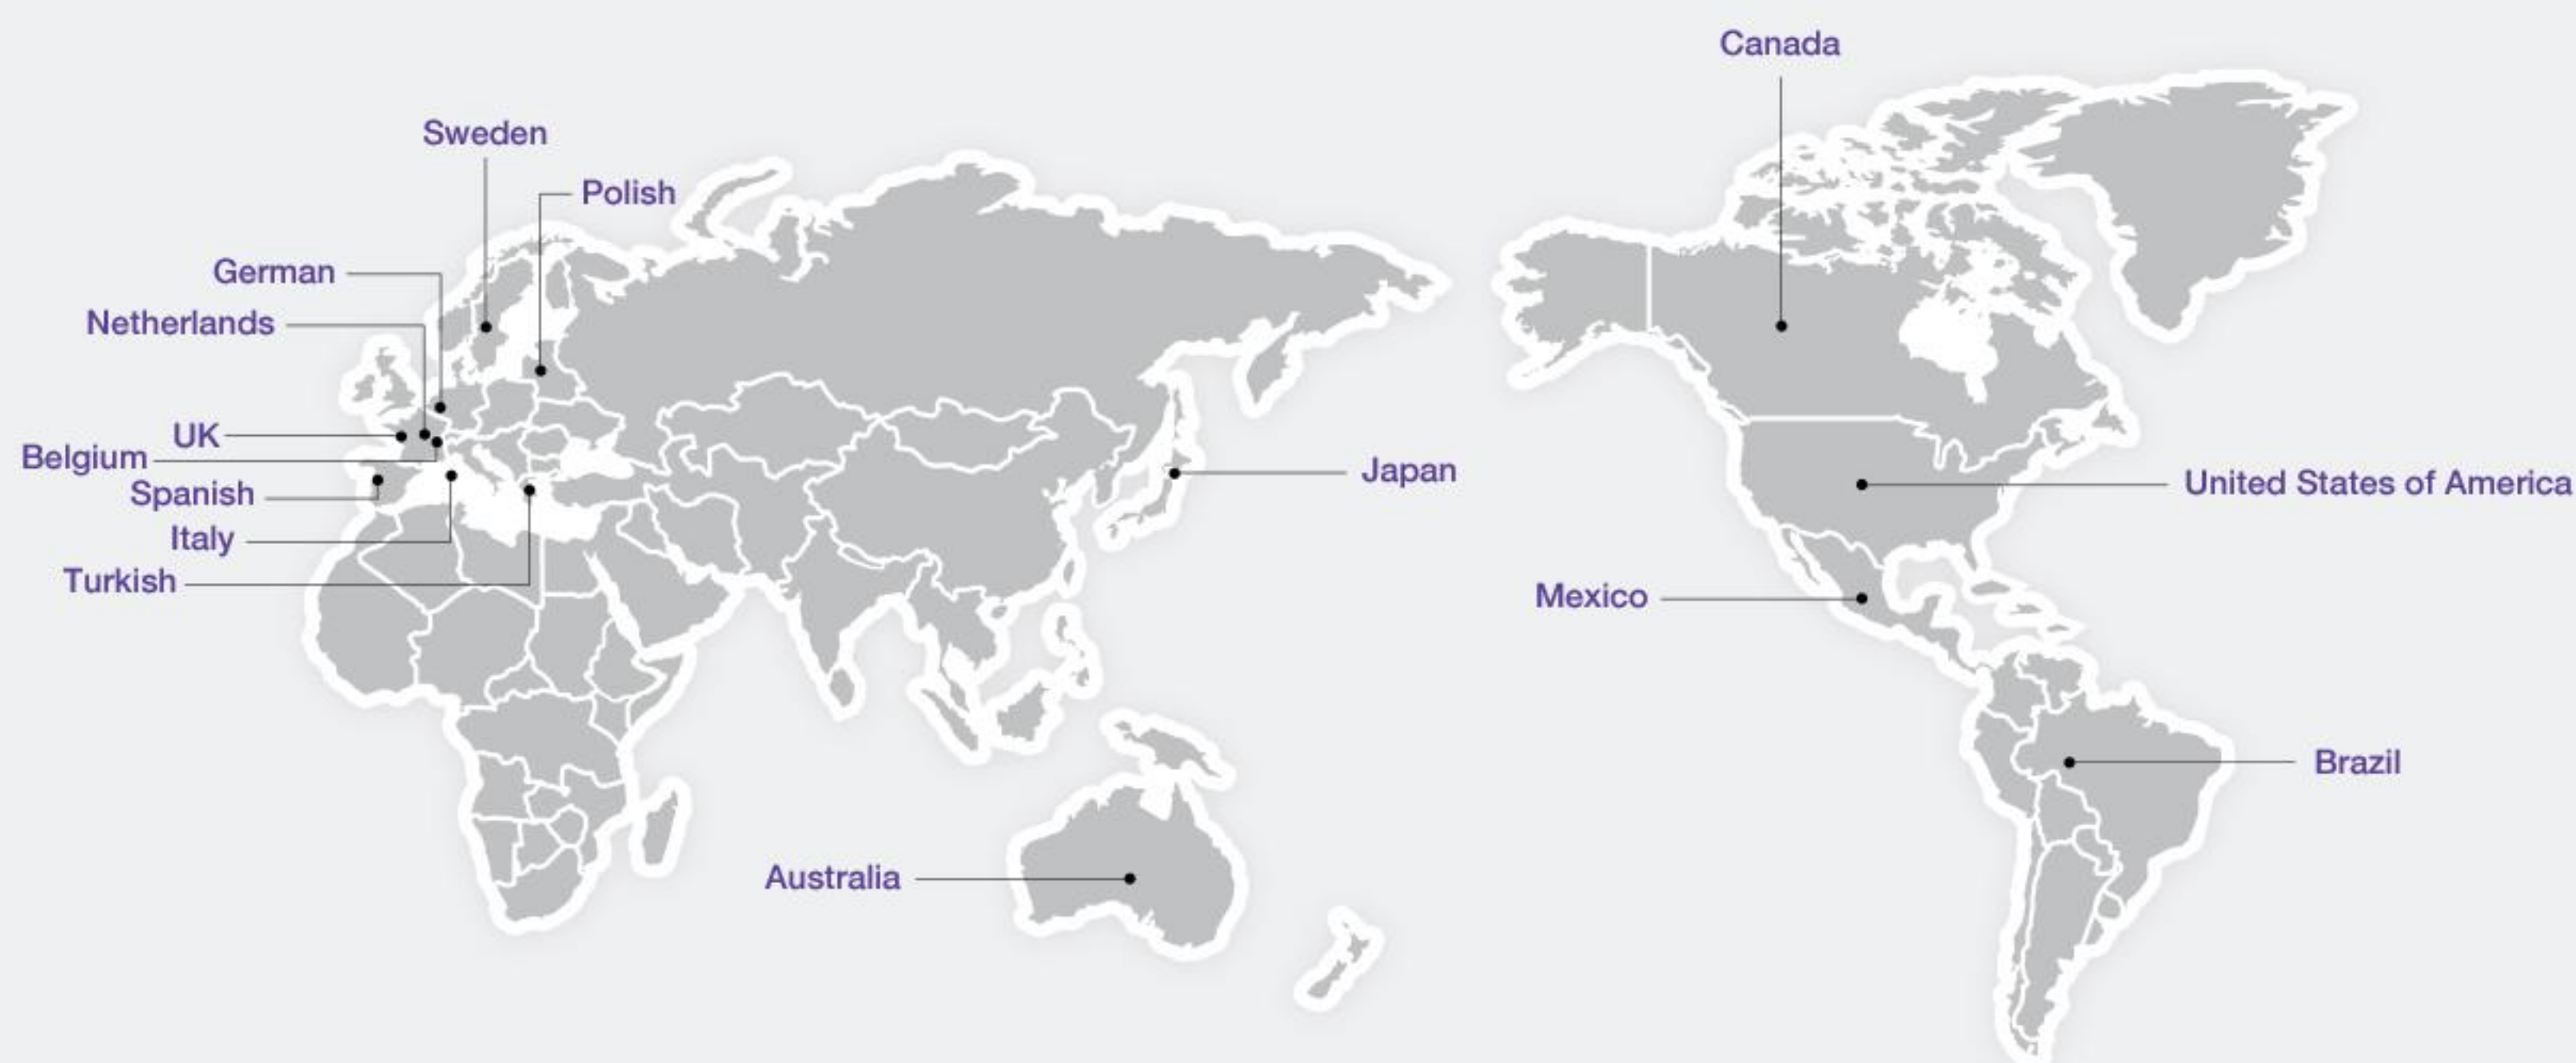

## Technical Specification

| Parameter       | Value                                                |
|-----------------|------------------------------------------------------|
| Product Type    | Keystone Punch Down Tool                             |
| Color           | Blue                                                 |
| Weight          | 417g                                                 |
| Handle Material | PP                                                   |
| Blade Material  | SK5 Steel                                            |
| Application     | Compatible with VCELINK C265 Series<br>Keystone Jack |
